Loopback Analytics Ranks 16 in *Dallas Business Journal's* "2015 Best Places to Work in North Texas" List

Healthcare Transitions Management Company Is Honored for High Employee Satisfaction

DALLAS – June 29, 2015 – Loopback Analytics, a pioneer in healthcare transitions and at-risk population management, announced today that the company is ranked 16 on the *Dallas Business Journal's* "2015 Best Places to Work in North Texas" list. The honor was announced at an event held last Thursday to recognize local companies that maintain extraordinarily high levels of employee satisfaction as measured by an independent research firm.

The 2015 Best Places to Work in North Texas rankings were announced on June 25 a special awards luncheon sponsored by the *Dallas Business Journal* at the Fairmont Dallas. The rankings of the 100 businesses on the list were revealed at the event, and honorees, including Loopback Analytics, were also featured in the June 26 issue of the *Dallas Business Journal.*

To select the top 100 employers, Quantum Workplace, an independent research firm, surveyed employees at hundreds of Dallas area businesses. After analyzing the data to determine comparative staff satisfaction levels, the firm identified the 100 best places to work in North Texas and assigned a rank to each. Loopback Analytics, provider of advanced solutions that assist healthcare providers as they adjust to a changing industry, was ranked #16.

"We always knew we had something special at Loopback Analytics with our uniquely teamwork-driven workplace," said Neil Smiley, president and CEO of Loopback Analytics. "Our people set us apart in a competitive marketplace, and I am so proud of their commitment to our customers and the knowledge and contributions each employee makes to our success."

As the provider of an advanced, cloud-based platform that integrates data across multiple healthcare information systems, Loopback Analytics gives healthcare organizations tools to accurately identify at-risk patient populations, rapidly trigger appropriate interventions and efficiently monitor outcomes, providing information that gives healthcare providers a path to success in a value-based healthcare ecosystem.
